Routing of Numbers for On Call staff

As all our clients have the NSC support number (021 6010739) for a point of contact, this number will remain constant and will be permanently diverted to Voxpro (0214233820).

The **IT support number (0214191237)** will now be the number that is to be diverted to your mobile while on call.

This phone is located in the technical office, and is not to be removed or unplugged for any reason.
